Here’s what registrants said about the 2009 presentation of this course:

“This course was timely, comprehensive and extremely valuable. It offered a very informative session on the present landscape and what can be expected in this new area of regulation for the United States in addition to the broader global context.”
- Joëlle Hervic, Earth Matters Law, P.A., Rockville, Maryland

“Overall, a very good, broad overview of the landscape of climate law.”

“Great comprehensive course. The ethical interactive discussion was well-staged and interesting.”

“The conference was excellent in content and very well-run.”

“Always get the highest caliber speakers who do an excellent job presenting the wealth of information.”

Understanding the emerging markets and regulations surrounding climate and carbon is a critical skill for practitioners of environmental, regulatory, energy, resources, administrative, corporate, and securities law.

A carbon-constrained world presents both risks and opportunities, and practitioners are expected to explain the new landscape to their clients. This course provides both the practical understanding and skills necessary to accomplish this task.

Special Keynote Address: Gina McCarthy, Assistant Administrator, Office of Air and Radiation, Environmental Protection Agency
This year’s program also features three optional sessions offered in addition to the more traditional discussions:

- An introductory lecture on Thursday morning, designed for those new to the practice or for those seeking a refresher, and
- Two informal, but practical lunchtime discussions on law firm and corporate management in a carbon-constrained world (not well-traveled).

Join your faculty and colleagues for a Networking Reception on Thursday evening, hosted by Latham & Watkins LLP. Followed by a Dutch Treat dinner at a nearby restaurant!

Program Summary:

In a world in which our energy and efficiency choices will impact the natural and economic world, this program offers participants a refresher on climate change and the legal issues attendant with both the regulation and the litigation of greenhouse gas emissions. The program will cover regulatory structures on the international, national, regional, and state levels; presentations address the impact on key sectors of the economy.

Join the ALI-ABA staff and faculty on March 4-5, 2010 in Washington, D.C. and participate in two informal, but practical lunchtime discussions on law firm and corporate management in a carbon-limited world (not webcast or recorded) as part of the ALI-ABA Course of Study, Global Warming: Climate Change and the Law.
